

SATO SLAB

PRODUCT SPECIFICATIONS

The sturdy and quick-to-install SATO Slab is designed to be easy to clean, self-supporting and suitable for all climates. The award-winning toilet pan design delivers freshness, comfort, and safety to those that do not have access to running water or sewer systems.

SATO701
SATO702
SATO703
SATO704

BENEFITS

- Self-supporting slab that comes complete with the SATO pan and/or SATO stool
- It requires minimal assembly and comes with sturdy iron pegs for quick and easy installation
- The one-piece slab has non-slip foot plates and is easy to clean with regular off-the-shelf product
- Raised bumps provide a pathway for the visually impaired
- Increased safety. Limited outlet aperture helps to prevent young children accidental falling into pits
- Designed for use with single and twin offset pits when used in conjunction with the I-Trap and V-Trap connection systems

KEY FEATURES

- Our innovative SATO pan bird door technology creates a self-closing counterweight action to create an air-tight seal to minimize odours
- Optimal counterweight action lets waste and flush water pass through, but otherwise stays closed
- The trap door reduces the transmission of preventable diseases from insects that come into contact with human waste
- Available in four configurations including stool and offset pit options
- Constructed from durable plastic

SATO
A BETTER LIFE.
EVERY DAY.
