PRODUCT SPECIFICATIONS

OUR AWARD-WINNING HAND WASHING SOLUTION

Portable, easy to use and affordable, the SATO Tap provides users with the benefits of handwashing without needing access to running water using as little as 100ml per hand wash.

SATO TAP

Benefits

- Requires no installation. Just place the SATO Tap where you need handwashing!
- Its unique design allows for a variety of plastic bottles commonly found in most households to be used as a water reservoir, giving a new lease of life to single use PET bottles that would otherwise be destined for landfill
- Simple to use design ensures that all – from kids to elderly – can access proper hygiene
- Light and easy to transport can be moved quickly and easily
- Its compact size can fit into anywhere handwashing is necessary
- Due to its accessible price, households and institutions can afford more than one solution and place them in different locations
- The most trusted industry judges approve! SATO Tap has been named one of TIME's Best Inventions of 2020 and selected as a finalist in Fast Company's World Changing Ideas Awards 2021

Key features

- Unique nozzle that releases just enough water to practice safe hygiene
- Contactless design that is operated with just a simple nudge with forearm or elbow to ensure minimal contact when shared in households and communities
- Soap tray for soap bars and liquid soap bottles
- Universal application – SATO Tap is designed to accept a common plastic bottle with a cap diameter of approximately 30 millimetres
- Made from durable, lightweight plastic

Cleaning and Maintenance

Easy to clean with regular off-the-shelf product
