

SATO600 TAP

Model Numbers:

- SATO600

Features/Benefits:

- Portable and easy to assemble handwashing solution
 - Small form factor allows placement of Tap in many places, especially in high usage locations (near toilets, food preparation areas, etc.)
 - Non-plumbed design does not require an active water connection
- Minimizes contamination by contact
 - Allows back of hand or forearm/elbow to operate
 - Water flow remains on when in use - frees up both hands during handwashing
- Optimized flow rate for hand washing as to not waste water
- Compatible with many common plastic beverage bottles
 - Reduces plastic waste by recycling bottles to use as water reservoir
- Mounting holes on base allows for secure installation (hardware not included)
 - Additional holes on top of base for hanging, if desired
- Includes integrated soap dish
