

SATO PAN

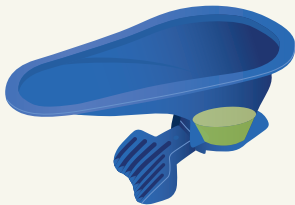

SATO

PART OF LIXIL

- **MINIMISES ODOURS:** award-winning trap door technology creates an air-tight seal that closes off pit latrines
- **WATER-SAVING:** our toilets require less than 1 litre per flush—80% less than conventional toilet pans
- **KEEPS FLIES AND INSECTS AWAY:** the trap door technology closes the pit when not in use, keeping flies and insects away
- **NO VISUAL CONTACT WITH HUMAN WASTE:** the trap door shuts out unpleasant view into dark pit and human waste
- **INCREASED SAFETY:** limited outlet aperture prevents young children from accidentally falling into pits
- **EASY TO INSTALL:** can be used in new construction or as a retrofit in existing toilets
- **EASY TO MAINTAIN:** our products are made from durable and recyclable plastic which is easy to clean with commercially available toilet cleaners, ensuring easy maintenance and a long-life to our products
- **EASY TO TRANSPORT:** SATO pans can be stacked, making it easy to transport. Because it is made of rigid plastic it is resistant to adverse geographies and will not break easily.
- **DURABLE:** We have machine-tested our products, with our trap-door technology lasting an estimated 100 years of use by a household of five members.
- **AFFORDABLE:** the SATO pan has been designed to be affordable and costs, on average 5 dollars (prices vary in each market)

HOW THE SATO PAN WORKS:

The SATO Pan has been used

The user pours water into the pan, which opens the trap door and flushes the waste

The counter-weight trap door closes and creates a liquid seal that keeps odours and insects away
